Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance:

Claims 1, 5 and 9 are allowed.

Regarding claim 1,5,9, the prior art reference Manning and Examiner's newly discovered reference Mikio fails to teach determining whether a termination situation is a normal termination or an interrupted termination as well as checking stored accounting data for each data communication along with the termination situation. Manning teaches determining call release situation and sending the call record to account server. Examiner's newly discovered reference Mikio teaches determining whether to continue or discontinue a communication as well as clearing data transmission and reception at the time of circuit release and ending accounting. However, there is no suggestion to combine the teachings of Manning and Mikio to teach determining each termination situation as well as checking stored accounting data for each data communication along with the termination situation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
